SUBJECT: Market Value Appraisal
Surplus Property 14
5180 Southwest 26th Avenue
Dania Beach, Broward County, Florida 33004
Integra Miami/Palm Beach File No. 123-2011-0512

Dear Mr. Lupo:

Integra Realty Resources – Miami/Palm Beach is pleased to submit the accompanying appraisal of the referenced property. The purpose of the appraisal is to develop an opinion of the market value of the fee simple interest in the property. The client for the assignment is the City of Dania Beach, and the intended use is for property disposition purposes.

The appraisal is intended to conform with the Uniform Standards of Professional Appraisal Practice (USPAP), the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute and applicable state appraisal regulations.

To report the assignments results, we use the summary report option of Standards Rule 2-2 of USPAP. Accordingly, this report contains summary discussions of the data, reasoning, and analyses that are used in the appraisal process whereas supporting documentation is retained in our file. The depth of discussion contained in this report is specific to the needs of the client and the intended use of the appraisal.

The subject is an existing single-family property that is approximately 1,754 square feet in size. The improvements were originally constructed in 1959. The site area is 0.37 acres or 16,263 square feet. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we

have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

Based on the valuation analysis in the accompanying report, and subject to the definitions, assumptions, and limiting conditions expressed in the report, our opinion of value is as follows:

VALUE CONCLUSION			
Appraisal Premise	Interest Appraised	Date of Value	Value Conclusion
Market Value	Fee Simple	October 18, 2011	\$68,000

EXTRAORDINARY ASSUMPTIONS & HYPOTHETICAL CONDITIONS

The value conclusions are subject to the following extraordinary assumptions that may affect the assignment results. An extraordinary assumption is uncertain information accepted as fact. If the assumption is found to be false as of the effective date of the appraisal, we reserve the right to modify our value conclusions.

1. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

The value conclusions are based on the following hypothetical conditions that may affect the assignment results. A hypothetical condition is a condition contrary to known fact on the effective date of the appraisal but is supposed for the purpose of analysis.

1. None

If you have any questions or comments, please contact the undersigned. Thank you for the opportunity to be of service.

Mr. Nicholas Lupo

Zoning Designation	RS-6000, Single-Family 6000 Residential	
Highest and Best Use - As if Vacant	Single-family residential use	
Highest and Best Use - As Improved	Continued single-family use	
Exposure Time; Marketing Period	6 - 12 months; 6 - 12 months	
Effective Date of the Appraisal	October 18, 2011	
Date of the Report	November 1, 2011	
Property Interest Appraised	Fee Simple	
Market Value Indications		
Cost Approach	Not Used	
Sales Comparison Approach	\$68,000	(\$38.77/SF)
Income Capitalization Approach	Not Used	
Market Value Conclusion	\$68,000	(\$38.77/SF)

The values reported above are subject to the definitions, assumptions, and limiting conditions set forth in the accompanying report of which this summary is a part. No party other than City of Dania Beach may use or rely on the information, opinions, and conclusions contained in the report. The summary shown above is for the convenience of City of Dania Beach, and therefore it is assumed that the users of the report have read the entire report, including all of the definitions, assumptions, and limiting conditions contained therein.

EXTRAORDINARY ASSUMPTIONS & HYPOTHETICAL CONDITIONS

The value conclusions are subject to the following extraordinary assumptions that may affect the assignment results. An extraordinary assumption is uncertain information accepted as fact. If the assumption is found to be false as of the effective date of the appraisal, we reserve the right to modify our value conclusions.

1. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

The value conclusions are based on the following hypothetical conditions that may affect the assignment results. A hypothetical condition is a condition contrary to known fact on the effective date of the appraisal but is supposed for the purpose of analysis.

1. None

GENERAL INFORMATION

IDENTIFICATION OF SUBJECT

The subject is an existing single-family property that is approximately 1,754 square feet in size. The improvements were originally constructed in 1959. The site area is 0.37 acres or 16,263 square feet. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

PROPERTY IDENTIFICATION	
Property Name	Surplus Property 14
Address	5180 Southwest 26th Avenue Dania Beach, Florida 33004
Tax ID	5042 32 18 0050
Legal Description	Lots 2A, 2B, 3A & 3B, Block 1, Caron Subdivision

CURRENT OWNERSHIP AND SALES HISTORY

The owner of record is The City of Dania Beach. This party acquired the property from Broward County Clerk of the Courts on May 28, 2008 for a price of \$0. The transaction is recorded in OR Book 45401, Page 1238.

To the best of our knowledge, no sale or transfer of ownership has occurred within the past three years, and as of the effective date of this appraisal, the property is not subject to an agreement of sale or option to buy, nor is it listed for sale.

TYPE OF VALUE, PROPERTY RIGHTS AND EFFECTIVE DATE

The purpose of the appraisal is to develop an opinion of the market value of the fee simple interest in the property as of the effective date of the appraisal, October 18, 2011. The date of the report is November 1, 2011. The appraisal is valid only as of the stated effective date or dates.

DEFINITION OF MARKET VALUE

Market value is defined as:

“The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- Buyer and seller are typically motivated;
- Both parties are well informed or well advised, and acting in what they consider their own best interests;
- A reasonable time is allowed for exposure in the open market;
- Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.”

(Source: Code of Federal Regulations, Title 12, Chapter I, Part 34.42[g])

DEFINITION OF PROPERTY RIGHTS APPRAISED

Fee simple estate is defined as, “Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.”

(Source: The Dictionary of Real Estate Appraisal, Fifth Edition, Appraisal Institute, Chicago, Illinois, 2010)

CLIENT, INTENDED USER AND INTENDED USE

The client and intended user is City of Dania Beach. The intended use is for property disposition purposes. The appraisal is not intended for any other use or user. No party or parties other than the City of Dania Beach may use or rely on the information, opinions, and conclusions contained in this report.

APPLICABLE REQUIREMENTS

This appraisal is intended to conform to the requirements of the following:

- Uniform Standards of Professional Appraisal Practice (USPAP);
- Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute;
- Applicable state appraisal regulations;

PRIOR SERVICES

USPAP requires appraisers to disclose to the client any services they have provided in connection with the subject property in the prior three years, including valuation, consulting, property management, brokerage, or any other services. We have performed no other services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

SCOPE OF WORK

To determine the appropriate scope of work for the assignment, we considered the intended use of the appraisal, the needs of the user, the complexity of the property, and other pertinent factors. Our concluded scope of work is described below.

VALUATION METHODOLOGY

Appraisers usually consider the use of three approaches to value when developing a market value opinion for real property. These are the cost approach, sales comparison approach, and income capitalization approach. Use of the approaches in this assignment is summarized as follows:

APPROACHES TO VALUE		
Approach	Applicability to Subject	Use in Assignment
Cost Approach	Not Applicable	Not Utilized
Sales Comparison Approach	Applicable	Utilized
Income Capitalization Approach	Not Applicable	Not Utilized

The **sales comparison approach** is the most reliable valuation method for the subject due to the following:

- There is an active market for properties similar to the subject, and sufficient sales data is available for analysis.
- This approach directly considers the prices of alternative properties having similar utility.
- This approach is typically most relevant for owner-user properties.

The **income approach** is not applicable to the subject because:

- This approach does not reflect the primary analysis undertaken by a typical owner-user.

The **cost approach** is not applicable to the subject considering the following:

- The age of the property makes estimates of accrued depreciation very subjective.
- There is a limited land market, making estimates of underlying land value subjective.
- This approach is not typically used by market participants, except for new properties.

DATA RESEARCH AND ANALYSIS

The process employed to collect, verify, and analyze relevant data is detailed in individual sections of the report. This includes the steps we took to verify comparable sales, which are disclosed in the comparable sale profile sheets in the addenda to the report. Although we make a concerted effort to confirm the arms-length nature of each sale with a party to the

transaction, it is sometimes necessary to rely on secondary verification from sources deemed reliable.

PROPERTY INSPECTION

Harry Newstreet, MAI conducted an exterior and a limited interior inspection of the property on October 18, 2011.

REPORT FORMAT

The report has been prepared under the summary report option of Standards Rule 2-2(b) of USPAP. As such, it contains summary discussions of the data, reasoning, and analyses that are used in the appraisal process whereas supporting documentation is retained in our file. The depth of discussion contained in this report is specific to the needs of the client and the intended use of the appraisal.

ECONOMIC ANALYSIS

BROWARD COUNTY AREA ANALYSIS

Broward County is located in South Florida and is 1,205 square miles in size and has a population density of 1,456 persons per square mile. Broward County is part of the Miami-Fort Lauderdale-Pompano Beach-Homestead, FL Metropolitan Statistical Area, hereinafter called the Miami MSA, as defined by the U.S. Office of Management and Budget.

POPULATION

Broward County has an estimated 2010 population of 1,754,788, which represents an average annual 0.8% increase over the 2000 census of 1,623,018. Broward County added an average of 13,177 residents per year over the 2000-2010 period, but its annual growth rate lagged the State of Florida rate of 1.7%.

POPULATION TRENDS					
	Population			Compound Ann. % Chng	
	2000 Census	2010 Est.	2015 Est.	2000 - 2010	2010 - 2015
Dania Beach	20,061	20,562	20,254	0.2%	-0.3%
Broward County	1,623,018	1,754,788	1,748,460	0.8%	-0.1%
Florida	15,982,378	18,917,612	19,720,776	1.7%	0.8%
Source: STDB/ ESRI					

Looking forward, Broward County's population is projected to decrease at a 0.1% annual rate from 2010-2015, equivalent to the loss of an average of 1,266 residents per year. Broward County's decline in population contrasts with Florida, which is projected to increase at a 0.8% rate.

EMPLOYMENT

Total employment in Broward County is currently estimated at 678,579 jobs. Between year end 2000 and the present, employment rose by 10,153 jobs, equivalent to a 1.5% increase over the entire period. Over the past decade, there were decreases in employment for four years out of ten.

Given the rise in employment over the last decade, Broward County fared better than Florida, which experienced a decline in employment of 3.4% or 247,234 jobs over this period. Trends in employment are a key indicator of economic health and strongly correlate with real estate demand.

Year	EMPLOYMENT TRENDS					
	Total Employment (Year End)				Unemployment Rate (Ann. Avg.)	
	Broward County		Florida		Broward County	Florida
		%	%			
		Change	Change			
2000	668,426		7,290,652		3.7%	3.8%
2001	672,286	0.6%	7,258,632	-0.4%	4.5%	4.7%
2002	683,909	3.2%	7,364,382	1.5%	5.8%	5.7%
2003	694,904	0.1%	7,453,831	1.2%	5.4%	5.3%
2004	716,849	3.2%	7,726,652	3.7%	4.5%	4.6%
2005	751,889	4.9%	7,990,613	3.4%	3.6%	3.8%
2006	762,870	1.5%	8,126,237	1.7%	3.1%	3.4%
2007	759,920	-0.4%	8,014,408	-1.4%	3.5%	4.1%
2008	727,529	-4.3%	7,585,913	-5.3%	5.3%	6.3%
2009	688,627	-5.3%	7,209,010	-5.0%	9.2%	10.5%
2010 ^a	678,579	-1.5%	7,043,418	-2.3%	10.4%	11.9%
Overall Change 2000-2010	10,153	1.5%	-247,234	-3.4%		
Avg Unemp. Rate 2000-2010					5.4%	5.8%
Unemployment Rate - August 2011					9.5%	10.9%

^aTotal employment data is as of June 2010; unemployment rate data reflects the average of 12 months of 2010.
Source: Bureau of Labor Statistics and Economy.com. Employment figures are from the Quarterly Census of Employment and Wages (QCEW).
Unemployment rates are from the Current Population Survey (CPS). The figures are not seasonally adjusted.

Unemployment rate trends are another way of gauging an area's economic health. Over the past decade, the Broward County unemployment rate has been generally lower than that of Florida, with an average unemployment rate of 5.4% in comparison to a 5.8% rate for Florida. This is another indication of the strength of the Broward County economy over the longer term.

At the current time, the Broward County unemployment rate is 9.5% in comparison to a 10.9% rate for Florida, a sign that the Broward County job market has been less severely impacted by the recent downturn.

Major employers in Broward County are shown in the table below.

MAJOR EMPLOYERS	
Broward County	
Name	Number of Employees
1 American Express	4,846
2 Nova Southeastern University	3,919
3 PRC	3,000
4 Kaplan Higher Education	3,000

7 Interbond Corp. of America dba BrandsMart U.S.A.	1,700
8 JM Family Enterprises	1,500
9 Spirit Airlines	1,466
10 Citrix Systems	1,428

Source: Enterprise Florida

GROSS DOMESTIC PRODUCT

Gross Domestic Product (GDP) is a measure of economic activity based on the total value of goods and services produced in a defined geographic area. Although GDP figures are not available at the county level, data reported for the Miami MSA is considered meaningful

when compared to the nation overall, as Broward County is part of the MSA and subject to its influence.

Economic growth, as measured by annual changes in GDP, has been similar in the Miami MSA and the United States overall during the past eight years. The Miami MSA has grown at a 1.6% average annual rate while the United States has grown at a 1.6% rate. The area appears to be harder hit in the recent downturn, as the Miami MSA's GDP declined by 4.5% in 2009 while the United States GDP declined by 2.1%.

The Miami MSA has a per capita GDP of \$41,502, which is 1% less than the United States GDP of \$42,031. This means that Miami MSA industries and employers are adding relatively less value to the economy than their counterparts in the United States overall.

GROSS DOMESTIC PRODUCT				
Year	(\$ Mil) Miami MSA	% Change	(\$ Mil) US	% Change
2002	205,973		11,560,300	
2003	213,056	3.4%	11,807,800	2.1%
2004	223,360	4.8%	12,212,600	3.4%
2005	237,147	6.2%	12,554,500	2.8%
2006	245,877	3.7%	12,895,900	2.7%
2007	248,601	1.1%	13,162,800	2.1%
2008	241,032	-3.0%	13,181,900	0.1%
2009	230,213	-4.5%	12,903,800	-2.1%
Compound % Chg (2002-2009)		1.6%		1.6%
GDP Per Capita 2009	\$41,502		\$42,031	

Source: Bureau of Economic Analysis and Economy .com

The figures in the table above represent inflation adjusted “real” GDP stated in 2005 dollars.

INCOME, EDUCATION AND AGE

Broward County has a higher level of household income than Florida. Median household income for Broward County is \$54,548, which is 9.3% greater than the corresponding figure for Florida.

MEDIAN HOUSEHOLD INCOME - 2010	
Broward County	\$54,548
Florida	\$49,910
Comparison of Broward County to Florida	▲ 9.3%
Source: STDB/ ESRI	

Residents of Broward County have a higher level of educational attainment than those of Florida. An estimated 30% of Broward County residents are college graduates with four year degrees, versus 26% of Florida residents. People in Broward County are slightly younger than their Florida counterparts. The median age for Broward County is 40 years, while the median age for Florida is 41 years.

EDUCATION AND AGE - 2010

Source: STDB/ ESRI

CONCLUSION

The recent downturn in the national economy has had a greater impact in Broward County than in many areas of the country.

Over the long term, Broward County will be affected by a flat to declining population base and higher income and education levels. Broward County experienced growth in the number of jobs and has maintained a generally lower unemployment rate than Florida over the past decade. Based on these factors, we anticipate that the Broward County economy will recover and employment growth will resume, strengthening the demand for real estate.

EASEMENTS, ENCROACHMENTS AND RESTRICTIONS

We were not provided a current title report to review. We are not aware of any easements, encumbrances, or restrictions that would adversely affect value. Our valuation assumes no adverse easements, encroachments or restrictions and that the subject has a clear and marketable title.

CONCLUSION OF LAND ANALYSIS

Overall, the physical characteristics of the site and the availability of utilities result in functional utility suitable for a variety of uses including those permitted by zoning. There are no other particular restrictions on development noted in the analysis.

AERIAL PHOTOGRAPH

IMPROVEMENTS DESCRIPTION AND ANALYSIS

The subject is an existing single-family property that is approximately 1,754 square feet in size. The improvements were originally constructed in 1959. The site area is 0.37 acres or 16,263 square feet. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

Air Conditioning	Central

IMPROVEMENTS ANALYSIS

Quality and Condition

The quality of construction is considered to be fair. The condition of the improvements is considered to be fair.

Functional Utility

The improvements appear to be adequately suited to their current use, and there do not appear to be any significant items of functional obsolescence.

Deferred Maintenance

As previously discussed, the property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require

repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. We have estimated these repairs to cost approximately \$32,000. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

Hazardous Substances

We are not aware of the presence of any hazardous substances at the property; however, we are not qualified to detect such substances.

Personal Property

There are no personal property items that would be significant to the overall valuation.

REAL ESTATE TAX ANALYSIS

Real estate taxes and assessments for the current tax year are shown in the following table.

TAXES AND ASSESSMENTS -							
Tax ID	Assessed Value			Tax Rate	Taxes and Assessments		
	Land	Improvements	Total		Ad Valorem Taxes	Direct Assessments	Total
5042 32 18 0050	\$56,920	\$30,270	\$87,190	0.220464%	\$192	\$0	N/A

Based on the concluded market value of the subject, the assessed value appears high.

HIGHEST AND BEST USE ANALYSIS

AS IF VACANT

Legally Permissible

The only permitted use under zoning that is consistent with prevailing land use patterns in the area is single-family residential use.

Physically Possible

There are no physical limitations that would prohibit development of a single-family residential use on the site.

Financially Feasible

Based on our analysis of the market, there is limited demand for additional single-family residential development at the current time. It appears that a newly developed single-family residential use on the site would not have a value commensurate with its cost; therefore single-family residential use is not considered to be financially feasible. Nevertheless, we expect an eventual recovery of the market accompanied by a rise in property values to a level that will justify the cost of new construction. Thus, it is anticipated that single-family residential development will become financially feasible in the future.

Maximally Productive

There does not appear to be any reasonably probable use of the site that would generate a higher residual land value than holding the property for future development of a single-family residential use. Accordingly, it is our opinion that holding the property for future single-family residential use, based on the normal market density level permitted by zoning, is the maximally productive use of the property.

Conclusion

Holding the property for future development of a single-family residential use is the only use that meets the four tests of highest and best use. Therefore, it is concluded to be the highest and best use of the property as if vacant.

AS IMPROVED

The subject site is developed with a single-family residence, which is consistent with the highest and best use of the site as if it were vacant.

Based on our analysis, there does not appear to be any alternative use that could reasonably be expected to provide a higher present value than the current use, and the value of the existing improved property exceeds the value of the site, as if vacant. For these reasons, continued single-family use is concluded to be maximally productive and the highest and best use of the property as improved.

VALUATION ANALYSIS

VALUATION METHODOLOGY

Appraisers usually consider three approaches to estimating the market value of real property. These are the cost approach, sales comparison approach and the income capitalization approach.

The **cost approach** assumes that the informed purchaser would pay no more than the cost of producing a substitute property with the same utility. This approach is particularly applicable when the improvements being appraised are relatively new and represent the highest and best use of the land or when the property has unique or specialized improvements for which there is little or no sales data from comparable properties.

The **sales comparison approach** assumes that an informed purchaser would pay no more for a property than the cost of acquiring another existing property with the same utility. This approach is especially appropriate when an active market provides sufficient reliable data. The sales comparison approach is less reliable in an inactive market or when estimating the value of properties for which no directly comparable sales data is available. The sales comparison approach is often relied upon for owner-user properties.

The **income capitalization approach** reflects the market's perception of a relationship between a property's potential income and its market value. This approach converts the anticipated net income from ownership of a property into a value indication through capitalization. The primary methods are direct capitalization and discounted cash flow analysis, with one or both methods applied, as appropriate. This approach is widely used in appraising income-producing properties.

Reconciliation of the various indications into a conclusion of value is based on an evaluation of the quantity and quality of available data in each approach and the applicability of each approach to the property type.

The methodology employed in this assignment is summarized as follows:

APPROACHES TO VALUE		
Approach	Applicability to Subject	Use in Assignment
Cost Approach	Not Applicable	Not Utilized
Sales Comparison Approach	Applicable	Utilized
Income Capitalization Approach	Not Applicable	Not Utilized

SALES COMPARISON APPROACH

The sales comparison approach develops an indication of value by comparing the subject to sales of similar properties. The steps taken to apply this approach are:

- Identify relevant property sales;
- Research, assemble, and verify pertinent data for the most relevant sales;
- Analyze the sales for material differences in comparison to the subject;
- Reconcile the analysis of the sales into a value indication for the subject.

To apply the sales comparison approach, we searched for sale transactions most relevant to the subject in terms of property type, location, size, age, quality, and transaction date. We use price per square foot of gross building area as the appropriate unit of comparison because market participants typically compare sale prices and property values on this basis. The most relevant sales are summarized in the following table.

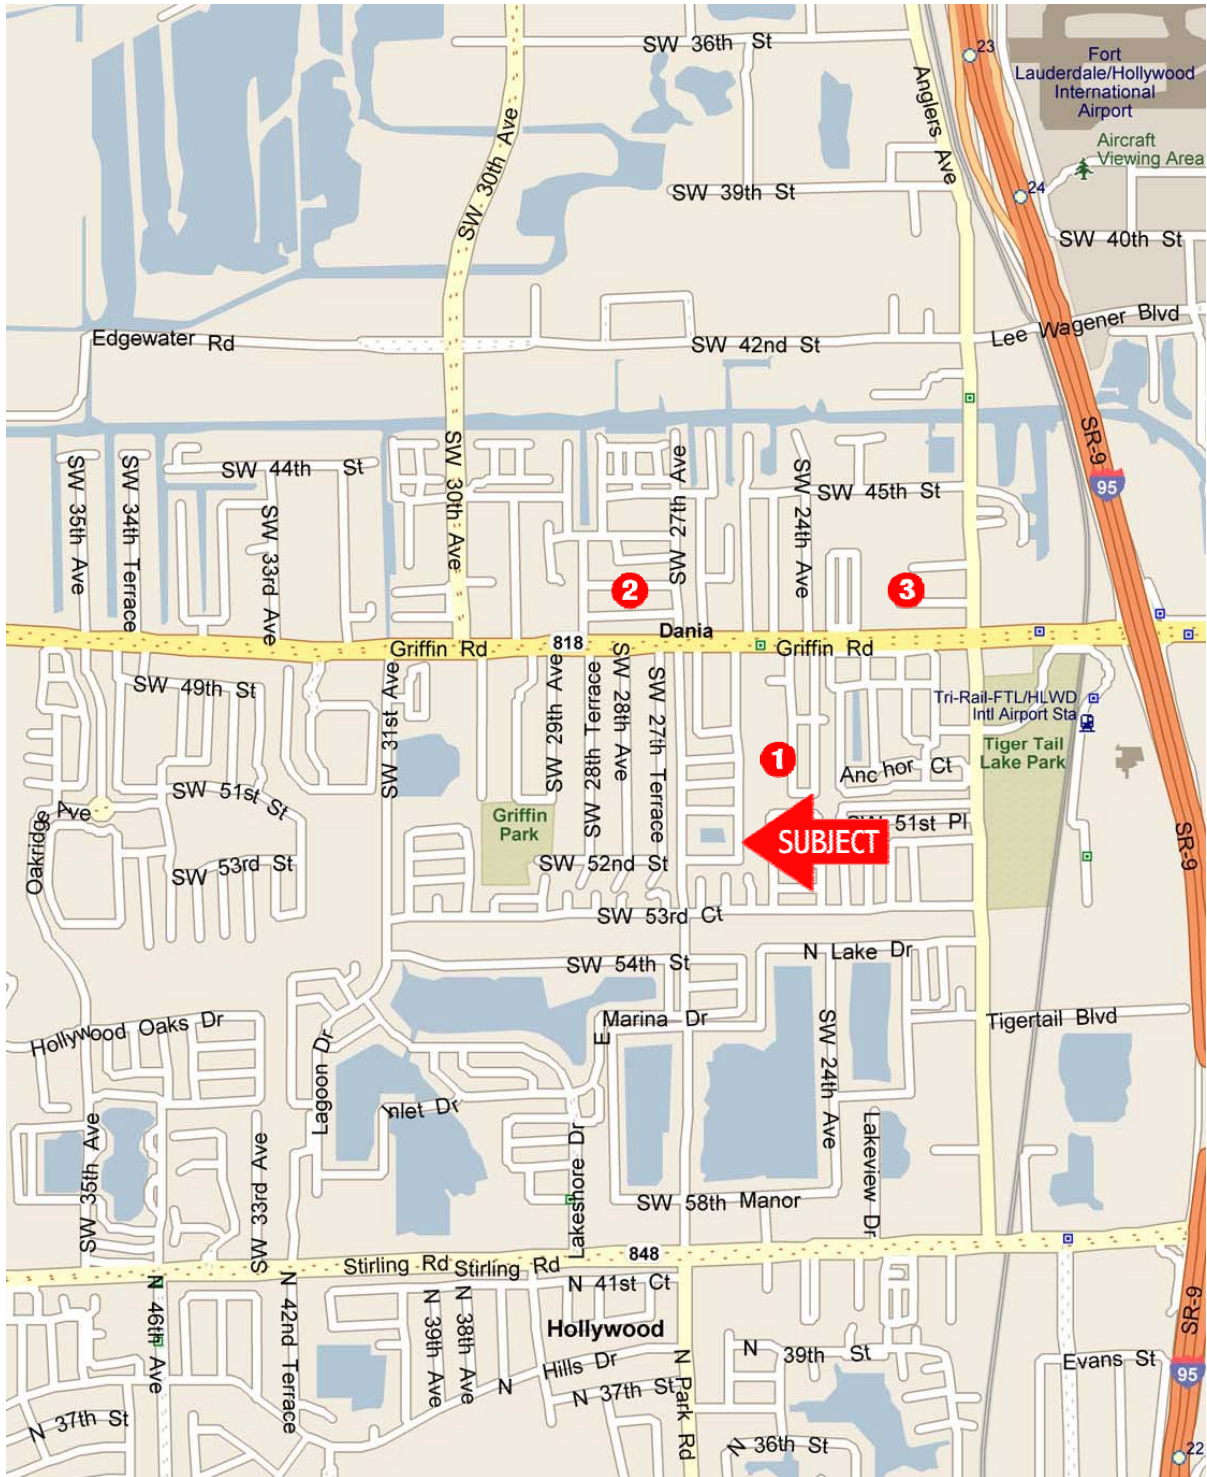

The sales are compared to the subject and adjusted to account for material differences that affect value. Adjustments are considered for the following factors, in the sequence shown below.

ADJUSTMENT FACTORS	
Effective Sale Price	Accounts for atypical economics of a transaction, such as excess land, non-realty components, expenditures by the buyer at time of purchase, or other similar factors. Usually applied directly to sale price on a lump sum basis.
Real Property Rights	Leased fee, fee simple, leasehold, partial interest, etc.
Financing Terms	Seller financing, or assumption of existing financing, at non-market terms.
Conditions of Sale	Extraordinary motivation of buyer or seller, such as 1031 exchange transaction, assemblage, or forced sale.
Market Conditions	Changes in the economic environment over time that affect the appreciation and depreciation of real estate.
Location	Market or submarket area influences on sale price; surrounding land use influences.
Size	Inverse relationship that often exists between size and value.
Age/Condition	Effective age; physical condition.
Quality	Construction quality, market appeal, functional utility.

The following table summarizes the adjustments we make to each sale.

IMPROVED SALES ADJUSTMENT GRID				
	Subject	Comparable 1	Comparable 2	Comparable 3
Property Name	Surplus Property	4954 SW 25th	2716 SW 47th	2180 SW 47th St.

COMPARABLE IMPROVED SALES MAP

VALUE INDICATION – SALES COMPARISON APPROACH

Sales 1 and 2 were considered the most similar to the subject. Therefore, we give greatest weight to these two sales, and arrive at a value indication by the sales comparison approach at \$57.00 per square foot. As previously discussed, the property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. We have estimated these repairs to cost approximately \$32,000. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

VALUE INDICATION BY SALES COMPARISON	
Indicated Value per SF	\$57.00
Subject Square Feet	1,754
Value before Adjustments	\$99,978
Adjustments	
Deferred Maintenance	-\$32,000
Total Adjustments	-\$32,000
Indicated Value	\$67,978
Rounded	\$68,000

RECONCILIATION AND CONCLUSION OF VALUE

The values indicated by our analyses are as follows:

SUMMARY OF VALUE INDICATIONS	
Cost Approach	Not Used
Sales Comparison Approach	\$68,000
Income Capitalization Approach	Not Used
Reconciled	\$68,000

VALUE CONCLUSION			
Appraisal Premise	Interest Appraised	Date of Value	Value Conclusion
Market Value	Fee Simple	October 18, 2011	\$68,000

EXTRAORDINARY ASSUMPTIONS & HYPOTHETICAL CONDITIONS

The value conclusions are subject to the following extraordinary assumptions that may affect the assignment results. An extraordinary assumption is uncertain information accepted as fact. If the assumption is found to be false as of the effective date of the appraisal, we reserve the right to modify our value conclusions.

1. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

The value conclusions are based on the following hypothetical conditions that may affect the assignment results. A hypothetical condition is a condition contrary to known fact on the effective date of the appraisal but is supposed for the purpose of analysis.

1. None

EXPOSURE AND MARKETING TIMES

Our estimates of exposure and marketing times are as follows:

EXPOSURE TIME AND MARKETING PERIOD	
Exposure Time (Months)	6 - 12
Marketing Period (Months)	6 - 12

CERTIFICATION

We certify that, to the best of our knowledge and belief:

1. The statements of fact contained in this report are true and correct.
2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are our personal, impartial, and unbiased professional analyses, opinions, and conclusions.
3. We have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
4. We have performed no other services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
5. We have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
6. Our engagement in this assignment was not contingent upon developing or reporting predetermined results.
7. Our compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
8. Our analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal practice as well as applicable state appraisal regulations.
9. The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
10. The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
11. Harry Newstreet, MAI made a personal inspection of the property that is the subject of this report.
12. No one provided significant real property appraisal assistance to the person(s) signing this certification.

13. We have experience in appraising properties similar to the subject and are in compliance with the Competency Rule of USPAP.
14. As of the date of this report, Harry Newstreet, MAI has completed the continuing education program of the Appraisal Institute.

Harry Newstreet, MAI
Certified General Real Estate Appraiser
Florida Certificate # RZ2278

ASSUMPTIONS AND LIMITING CONDITIONS

This appraisal is based on the following assumptions, except as otherwise noted in the report.

1. The title is marketable and free and clear of all liens, encumbrances, encroachments, easements and restrictions. The property is under responsible ownership and competent management and is available for its highest and best use.
2. There are no existing judgments or pending or threatened litigation that could affect the value of the property.
3. There are no hidden or undisclosed conditions of the land or of the improvements that would render the property more or less valuable. Furthermore, there is no asbestos in the property.
4. The revenue stamps placed on any deed referenced herein to indicate the sale price are in correct relation to the actual dollar amount of the transaction.
5. The property is in compliance with all applicable building, environmental, zoning, and other federal, state and local laws, regulations and codes.
6. The information furnished by others is believed to be reliable, but no warranty is given for its accuracy.

This appraisal is subject to the following limiting conditions, except as otherwise noted in the report.

1. An appraisal is inherently subjective and represents our opinion as to the value of the property appraised.
2. The conclusions stated in our appraisal apply only as of the effective date of the appraisal, and no representation is made as to the effect of subsequent events.
3. No changes in any federal, state or local laws, regulations or codes (including, without limitation, the Internal Revenue Code) are anticipated.
4. No environmental impact studies were either requested or made in conjunction with this appraisal, and we reserve the right to revise or rescind any of the value opinions based upon any subsequent environmental impact studies. If any environmental impact statement is required by law, the appraisal assumes that such statement will be favorable and will be approved by the appropriate regulatory bodies.
5. Unless otherwise agreed to in writing, we are not required to give testimony, respond to any subpoena or attend any court, governmental or other hearing with reference to the property without compensation relative to such additional employment.
6. We have made no survey of the property and assume no responsibility in connection with such matters. Any sketch or survey of the property included in this report is for illustrative purposes only and should not be considered to be scaled accurately for size. The appraisal covers the property as described in this report, and the areas and dimensions set forth are assumed to be correct.

7. No opinion is expressed as to the value of subsurface oil, gas or mineral rights, if any, and we have assumed that the property is not subject to surface entry for the exploration or removal of such materials, unless otherwise noted in our appraisal.
8. We accept no responsibility for considerations requiring expertise in other fields. Such considerations include, but are not limited to, legal descriptions and other legal matters such as legal title, geologic considerations such as soils and seismic stability, and civil, mechanical, electrical, structural and other engineering and environmental matters.
9. The distribution of the total valuation in the report between land and improvements applies only under the reported highest and best use of the property. The allocations of value for land and improvements must not be used in conjunction with any other appraisal and are invalid if so used. The appraisal report shall be considered only in its entirety. No part of the appraisal report shall be utilized separately or out of context.
10. Neither all nor any part of the contents of this report (especially any conclusions as to value, the identity of the appraisers, or any reference to the Appraisal Institute) shall be disseminated through advertising media, public relations media, news media or any other means of communication (including without limitation prospectuses, private offering memoranda and other offering material provided to prospective investors) without the prior written consent of the person signing the report.
11. Information, estimates and opinions contained in the report and obtained from third-party sources are assumed to be reliable and have not been independently verified.
12. Any income and expense estimates contained in the appraisal report are used only for the purpose of estimating value and do not constitute predictions of future operating results.
13. If the property is subject to one or more leases, any estimate of residual value contained in the appraisal may be particularly affected by significant changes in the condition of the economy, of the real estate industry, or of the appraised property at the time these leases expire or otherwise terminate.
14. No consideration has been given to personal property located on the premises or to the cost of moving or relocating such personal property; only the real property has been considered.
15. The current purchasing power of the dollar is the basis for the value stated in our appraisal; we have assumed that no extreme fluctuations in economic cycles will occur.
16. The value found herein is subject to these and to any other assumptions or conditions set forth in the body of this report but which may have been omitted from this list of Assumptions and Limiting Conditions.
17. The analyses contained in the report necessarily incorporate numerous estimates and assumptions regarding property performance, general and local business and economic conditions, the absence of material changes in the competitive environment and other matters. Some estimates or assumptions, however, inevitably will not materialize, and unanticipated events and circumstances may occur; therefore, actual

- results achieved during the period covered by our analysis will vary from our estimates, and the variations may be material.
18. The Americans with Disabilities Act (ADA) became effective January 26, 1992. We have not made a specific survey or analysis of the property to determine whether the physical aspects of the improvements meet the ADA accessibility guidelines. We claim no expertise in ADA issues, and render no opinion regarding compliance of the subject with ADA regulations. Inasmuch as compliance matches each owner's financial ability with the cost to cure the non-conforming physical characteristics of a property, a specific study of both the owner's financial ability and the cost to cure any deficiencies would be needed for the Department of Justice to determine compliance.
 19. The appraisal report is prepared for the exclusive benefit of the Client, its subsidiaries and/or affiliates. It may not be used or relied upon by any other party. All parties who use or rely upon any information in the report without our written consent do so at their own risk.
 20. No studies have been provided to us indicating the presence or absence of hazardous materials on the subject property or in the improvements, and our valuation is predicated upon the assumption that the subject property is free and clear of any environment hazards including, without limitation, hazardous wastes, toxic substances and mold. No representations or warranties are made regarding the environmental condition of the subject property and the person signing the report shall not be responsible for any such environmental conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because we are not experts in the field of environmental conditions, the appraisal report cannot be considered as an environmental assessment of the subject property.
 21. The person signing the report may have reviewed available flood maps and may have noted in the appraisal report whether the subject property is located in an identified Special Flood Hazard Area. We are not qualified to detect such areas and therefore do not guarantee such determinations. The presence of flood plain areas and/or wetlands may affect the value of the property, and the value conclusion is predicated on the assumption that wetlands are non-existent or minimal.
 22. Integra Realty Resources – Miami/Palm Beach is not a building or environmental inspector. Integra Miami/Palm Beach does not guarantee that the subject property is free of defects or environmental problems. Mold may be present in the subject property and a professional inspection is recommended.
 23. The appraisal report and value conclusion for an appraisal assumes the satisfactory completion of construction, repairs or alterations in a workmanlike manner.
 24. It is expressly acknowledged that in any action which may be brought against Integra Realty Resources – Miami/Palm Beach, Integra Realty Resources, Inc. or their respective officers, owners, managers, directors, agents, subcontractors or employees (the "Integra Parties"), arising out of, relating to, or in any way pertaining to this engagement, the appraisal reports, or any estimates or information contained therein, the Integra Parties shall not be responsible or liable for any incidental or consequential damages or losses, unless the appraisal was fraudulent or prepared with

- gross negligence. It is further acknowledged that the collective liability of the Integra Parties in any such action shall not exceed the fees paid for the preparation of the appraisal report unless the appraisal was fraudulent or prepared with gross negligence. Finally, it is acknowledged that the fees charged herein are in reliance upon the foregoing limitations of liability.
25. Integra Realty Resources – Miami/Palm Beach, an independently owned and operated company, has prepared the appraisal for the specific purpose stated elsewhere in the report. The intended use of the appraisal is stated in the General Information section of the report. The use of the appraisal report by anyone other than the Client is prohibited except as otherwise provided. Accordingly, the appraisal report is addressed to and shall be solely for the Client's use and benefit unless we provide our prior written consent. We expressly reserve the unrestricted right to withhold our consent to your disclosure of the appraisal report (or any part thereof including, without limitation, conclusions of value and our identity), to any third parties. Stated again for clarification, unless our prior written consent is obtained, no third party may rely on the appraisal report (even if their reliance was foreseeable).
26. The conclusions of this report are estimates based on known current trends and reasonably foreseeable future occurrences. These estimates are based partly on property information, data obtained in public records, interviews, existing trends, buyer-seller decision criteria in the current market, and research conducted by third parties, and such data are not always completely reliable. Integra Realty Resources, Inc. and the undersigned are not responsible for these and other future occurrences that could not have reasonably been foreseen on the effective date of this assignment. Furthermore, it is inevitable that some assumptions will not materialize and that unanticipated events may occur that will likely affect actual performance. While we are of the opinion that our findings are reasonable based on current market conditions, we do not represent that these estimates will actually be achieved, as they are subject to considerable risk and uncertainty. Moreover, we assume competent and effective management and marketing for the duration of the projected holding period of this property.
27. All prospective value estimates presented in this report are estimates and forecasts which are prospective in nature and are subject to considerable risk and uncertainty. In addition to the contingencies noted in the preceding paragraph, several events may occur that could substantially alter the outcome of our estimates such as, but not limited to changes in the economy, interest rates, and capitalization rates, behavior of consumers, investors and lenders, fire and other physical destruction, changes in title or conveyances of easements and deed restrictions, etc. It is assumed that conditions reasonably foreseeable at the present time are consistent or similar with the future.
28. The appraisal is also subject to the following:

EXTRAORDINARY ASSUMPTIONS & HYPOTHETICAL CONDITIONS

The value conclusions are subject to the following extraordinary assumptions that may affect the assignment results. An extraordinary assumption is uncertain information accepted as fact. If the assumption is found to be false as of the effective date of the appraisal, we reserve the right to modify our value conclusions.

1. The property has an enclosed carport area that was not permitted and is not in compliance with the building code. These improvements must be either brought up to code or removed. We have not been provided any repair estimates for these required repairs. In addition, it appears that the roof requires replacement and the pool may require repairs in order to make it functional. Given the fact that there have been no repair estimates prepared for the property, we have estimated these costs. If the costs to repair the property differ substantially from our estimates, we reserve the right to amend our estimate of market value.

The value conclusions are based on the following hypothetical conditions that may affect the assignment results. A hypothetical condition is a condition contrary to known fact on the effective date of the appraisal but is supposed for the purpose of analysis.
