2014 Standard Mileage Rates

IR-2013-95, Dec. 6, 2013

WASHINGTON — The Internal Revenue Service today issued the 2014 optional rates used to calculate the deductible costs of operating an automobile for business, medical or moving purposes.

Beginning on Jan. 1, 2014, the standard mileage rates for the use of a car (also van or panel trucks) will be:

- 56 cents per mile for business miles driven
- 23.5 cents per mile driven for medical or moving purposes
- 14 cents per mile driven in service of charitable organizations

The business, medical, and moving expense rates decrease one-half cent from the charitable rate is based on statute.

The standard mileage rate for business is based on an annual study of the fixed and variable costs of operating an automobile. The rate for medical and moving purposes is based on actual costs.

Taxpayers always have the option of calculating the actual costs of using their vehicle instead of using the standard mileage rates.

A taxpayer may not use the business standard mileage rate for a vehicle after using the actual cost method under the Modified Accelerated Cost Recovery System (MACRS) or after claiming the Section 179 deduction for that vehicle. In addition, the business standard mileage rate cannot be used for more than four vehicles used simultaneously.

These and other requirements for a taxpayer to use a standard mileage rate to calculate the deduction for a deductible business, moving, medical, or charitable expense are in Rev. Proc. [2013-80](#) contains the standard mileage rates, the amount a taxpayer must use in computing the deduction, and the maximum standard automobile cost that a taxpayer may use in computing the allowance for depreciation. The fixed and variable rate plan.
